

National Immunization Awareness Month

Vaccines can help you and your child live healthy and happy lives. Vaccines help you stay free from infection, severe illness, and any lifestyle restrictions that these serious illnesses can cause. Talk to your healthcare provider about vaccinations before your children go back to school this Fall:

- Stay up to date on routine child check-ups to support your child's growth and development and raise any health concerns you may have with your healthcare provider
- Work with your healthcare provider to get your child the recommended vaccines based on their vaccination schedule
- Remember to take care of yourself and see your healthcare provider for wellness visits or vaccinations so you and your family can live freely and safely
