

ROOF PROP TRAINING SESSIONS

Roof Prop Rules and Guidelines:

- Department shall select roof prop position ahead of time – Flat or Peaked – Can only do one set position during session
- Department shall provide 6-8 sheets of 5/8” plywood (4’x8’ size)
- No more than twelve (12) firefighters per session for roof prop
- Department(s) shall ensure that all firefighters have had prior training on power saws and safety familiarization
- A running power saw shall never be raised or lifted more than 6” above the roof deck
- All department power saws shall be checked prior to the roof prop training session for safety and maintenance reasons. All blades and chains shall be properly tightened.
- All firefighters shall have proper PPE and eye protection when operating a power saw during a roof prop training session
- All rotary saw blades that are spinning shall be stopped by placing the blade on the roof deck
- See [Power Saw Safety Guidelines](#) on Drill Ground Page
