(Business Registration Certificate)

(Revised 2/2017)

We propose that our fees be structured as an Energy Agent Consulting Fee that will be incorporated into the electricity supply bid specifications as a \$/kWh fee and into the natural gas supply bid specifications as a \$/therm fee. These fees will be included in the Third-Party Supplier (TPS) bid pricing received and incorporated into each awarded energy supply contract to be paid to Concord based upon actual monthly usage for the duration of the contract term. Concord will not require any upfront fees from the County of Monmouth in order to provide energy consulting services for the procurement of electricity and natural gas for county-owned facilities.

The specific all-inclusive Fee Concord proposes for its services:

Electricity \$0.00083/kWh

Natural Gas Services Fee - \$0.014/therm

Statement of Integrity

Electricity and Natural Gas commodity market conditions have increased and may not provide favorable bidding conditions that will result in savings versus the utility price to compare and/or previous contracted rates. Concord affirms that our fees are 100% at risk and the County will not be responsible for payment of any fees in the event no award(s) are made.
